

FOR IMMEDIATE RELEASE- Fort Mill Police Department Moving Inside New Town Hall Building

April 14, 2025— The Fort Mill Police Department is excited to announce the relocation of its headquarters to a new office space within the Town of Fort Mill's new Town Hall. This move is part of the department's ongoing efforts to enhance its services and provide a more efficient and modern environment for its officers and staff.

The new office will be located at 205 North White Street, inside the newly remodeled Fort Mill Town Hall. The office will be open to the public beginning April 21, 2025.

Until that time, members of the public will still be able to meet with officers at the current location at 112 Confederate Street through April 20, 2025. After that date, all operations and public services will be fully transitioned to the new office within the Town Hall.

The new facility offers more space while maintaining a central location in town with increased visibility, ensuring the department can serve the community more effectively. In addition, the new location provides enhanced resources, improved security features, and greater accessibility for the public, all of which will help the department continue to deliver high-quality services to the Fort Mill community.

"We're excited to welcome the Fort Mill Police Department into our new Town Hall facility," said Town Manager Cary Vargo. "Having our departments under one roof will create a more unified, efficient experience for our residents—making it easier than ever to access the services they need and ensuring we continue to provide the highest level of public service."

The Fort Mill Police Department encourages the public to stay informed about the move, and any updates or changes to public services will be shared via the Town of Fort Mill website and the police department's social media channels.
